

Featured Alum: Karl Gross

Years Attended: 1975-76

Area of Study: General

Email:

Karl is a nuclear engineer and consultant around the United States. He finished his BS at University of Arizona. He is now supporting Next Gen and SMR nuclear projects.

Special memories of YC were living in the dorm, midnight trips to NAU, commuting over Mingus to Jerome, bottomless cups of coffee at Sambos on Gurley while studying. Making donuts on the an inner-tube behind a jeep in the snow and the earthquake while in the chem lab were also part of the excitement.

Most significant person was Dr. Beverly in chemistry and his wind energy projects. English department saved him many times in his career...writing skills are important.

Enjoyed his time at YC, learned alot and now sending his own children to community college before immersion into the university culture.
